Compare the Schiek Advantages

Elastic Belts

Patented Shape

Schiek belts form a cone shape essential for the perfect fit.
Elastic belts conform and stretch, thus losing some of the essential support.

New Patented Hip and Rib Contour

Provides ultimate comfort and flexibility.
Elastic belts cover most of the hip and ribs.

Patented One-Way Velcro® Closure

Amazing One-Way Velcro® allows belt fastener to slide in one direction only for quick and exact fit.
Elastic belt has an adjustable tension strap.

Special Lumbar Insert

Reinforces the natural shape of the spine.
Elastic belts simply conform to your back losing essential support.

Dual Support

Schiek belts are designed to support BOTH the lower back and abdominal area. The abs are the key to complete lower back support and no other belt offers the dual support of Schiek.

Covered under US Patents No. 5,046,488, 5,053,883, and 5,316,022.

Most scientific literature suggests that weight belts can help to prevent injuries.
